

The CIAQ team is happy to welcome two new specialists

Guillaume Ménard,
advisor in genetics

Guillaume Ménard started to work as an advisor in genetics for the CIAQ Genetics Expertise department on 4 September.

Guillaume has just completed a Bachelor's degree in Agricultural Science at Laval University. During his studies, he has acquired several relevant work experiences, namely as an advisor in dairy production with Valacta and assistant advisor at Holstein Québec. Guillaume grew up on a dairy farm located in Verchères and he has worked on various dairy farms.

His main function is to supply state-of-the-art consulting services in genetics, namely by supporting CIAQ's front-line representatives and by making consulting visits for the Tandem Service.

Melissa Bowers,
agricultural technician

Melissa Bowers joined the CIAQ Communications department as agricultural technician for communications and young sire testing program (PEP) on 15 September.

Graduated from the University of Western Ontario in 2007 in Managerial and Organizational Studies, Melissa grew up on a dairy farm located in Coaticook, and up until recently, she worked as an advisor in animal production/ruminants for a food company.

Collaborating in the promotion of CIAQ sires and services through the preparation of documents and public relations activities, and supporting the organization's consulting services will be Melissa's main tasks. As well, she will contribute to the management of the young sire testing program (PEP).
