Holstein

[Ayrshire](#) [Jersey](#) [Brown Swiis and Canadienne](#)

Nine Semex Alliance sires among the top ten in the Holstein breed

This time, with the modifications to the LPI formula that put more emphasis on the health and fertility traits, there were some more significant variations in the ranking of proven sires. The sires with the highest indexes for daughter fertility make gains contrary to those with a lower index for that trait.

Among the proven sires : [Goldwyn](#) is 2nd for LPI and #1 for type with an rating of +18. [Ashlar](#) is 4th thanks to very high indexes for daughter fertility and calving ability. [Mr Burns](#) is 6th, [Dolman](#) 7th, [Pagewire](#) 9th and [Bonair](#) 10th. Among those who show the most improvement are [Derek](#) with a gain of 251 LPI points, [Samuelo](#) (+234) and [Ashlar](#) (+192).
