

It is under the theme "La santé, je m'en occupe" that will be held **on 19 March at Victoriaville** the 3rd edition of the CP CAB Forum. A complete schedule will await you, intended for both experienced breeders and young producers.

Take this opportunity to come and discuss with our partners about your breeding objectives and the feasible strategies to reach them. Other items such as the influence of a cow's functional traits on her herd life, genetic selection and the importance of giving a chance to young people will also be on the agenda.

For more information or to register, please contact **Barbara Paquet** at **418-685-2244**.
